

HTML - Accessibility score

-First the score was 73

-To get this too 100 I:

-set the language to English by using `<html lang = "en">`

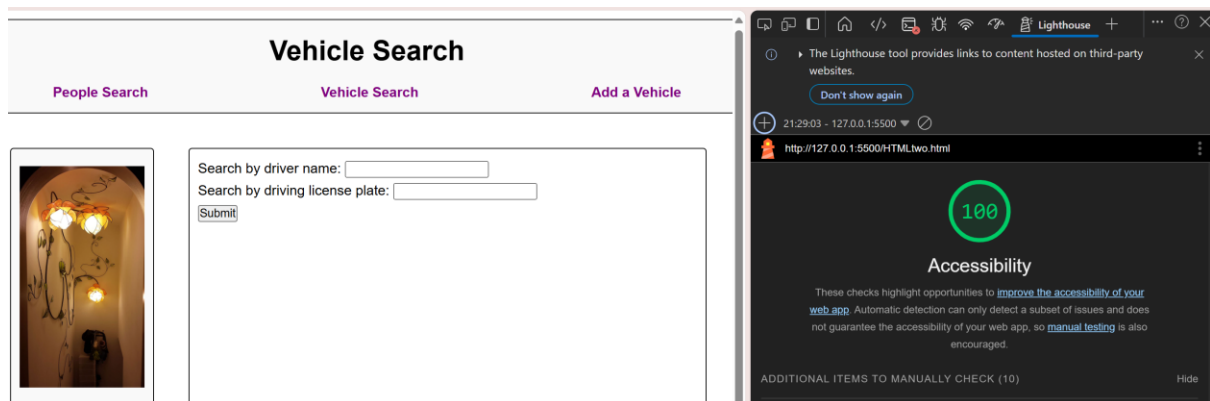

-in all HTML files line 2

-removed the space in `<label for=" driver-name">Search by driver name:</label>` so that it said: `<label for="driver-name">Search by driver name:</label>`

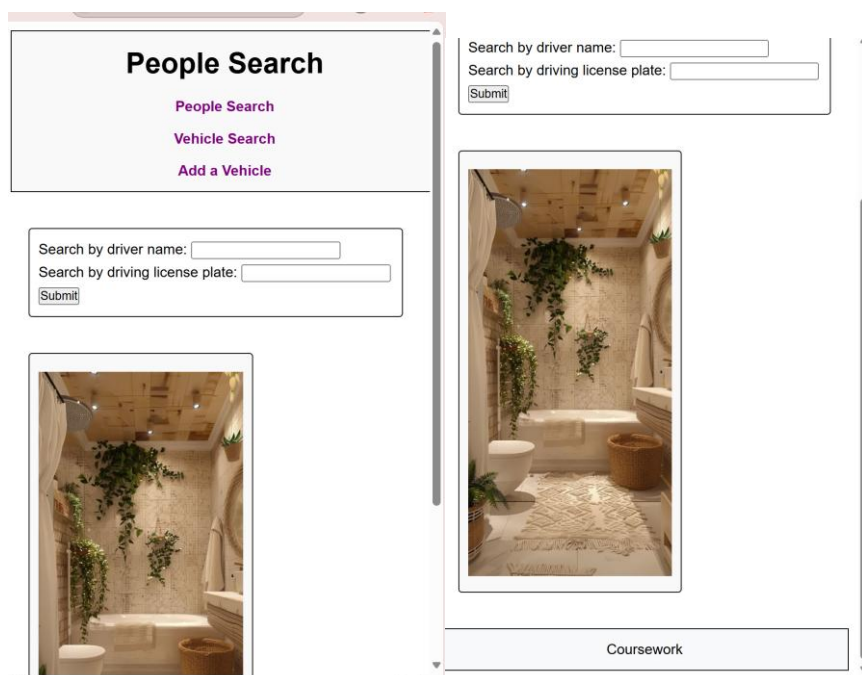

-in files HTMLone and HTMLtwo line 31

-included an alt in all images `<img src = "image1.jpg" class = "sidebar1-image" alt="bathroom">`

-in all HTML files line 26

CSS – 500px or less screen

In file styleone.css from lines 260-289. The footer and sidebar have both been given an order of 2 so that they stay at the bottom of the page. Flex is also used to get a 1:4 ratio of the sidebar and footer respectively. Links have been stacked vertically by using flex-direction: column;.

JavaScript and database – no additional work was completed
